## Save the Manatees!

Manatees are amazing sea animals. They are large and plump, with a gentle, friendly look. These unusual animals need our help.

Manatees need to stay warm, so they swim in shallow waters. These places are warmer than deep waters. They are also full of boats. A speeding boat can hurt or even kill a manatee.

Some places have laws to help manatees. The laws tell boaters to slow down. However, some boaters still go too fast. Officers aren't always there to make sure people obey the laws. Boaters need to be very careful. The cities and towns near manatee habitats can help, too. They should hire more officers to stop speeding boats.

Saving the manatees takes time and money, but these gentle creatures are worth it. Everyone should help to save them.
